PERSONAL PROFILE

Warm and energetic high school science teacher with 7 years of teaching experience working in a progressive public school in NYC. Designed project-based, student-centered curriculum in Physics, Astronomy, Arduinos, Web Development, Game Design, and Cybersecurity. Experience serving middle and high school students from diverse backgrounds, education levels, and learning needs. Passionate about exposing more students to Astronomy and coding. Actively seeking to improve pedagogy to be more culturally responsive. Reflective, loves to be challenged, and excited about experimenting with innovating classroom teaching.
